Department: Chemistry

Sr. No.	Suggestions	Action Taken
1	Add internship in each semester for the development of student knowledge in UG curriculum	Since the 2021-22 academic year, we have updated our Scheme of Learning and Evaluation for the undergraduate curriculum. This update includes core enrichment courses in each semester, which encompass Concept to Practice, Internship, Training, Mini Project-1 (Industrial/Social Immersion), Minor Project, Dissertation, Review Article, Instrumental Training, Skill Training, Startup Practical.
2	Metal catalytical reaction add in PG curriculum	Incorporate Palladium metal catalytic reactions into the postgraduate curriculum as Module-5.

Action Taken Report based on Employer's Feedback

Faulty: Faculty of Business and Commerce

Department: Commerce

Sr. No.	Suggestions	Action Taken
1	Employers suggest incorporating online courses as a component of our Master's degree programs to complement and enhance the traditional curriculum. Online courses can provide students with flexibility in their learning schedules, allowing them to delve deeper into specialized subjects not fully covered during in-person classes.	In response to insightful feedback from employers, we will be incorporating online courses into our Master's degree programs. This exciting addition is designed to complement and enhance our traditional curriculum, offering students greater flexibility and access to a wider range of learning resources. By integrating online courses, we aim to provide a more dynamic and comprehensive educational experience that aligns with current industry trends and prepares our students for the evolving professional landscape.

Sr. No.	Suggestions	Action Taken
1	Employers recommend to include skill-specific subjects, such as computer proficiency, as part of the curriculum for all logistics students. By incorporating structured training in computer skills, university can ensure that all students, regardless of their major, develop a strong foundation in digital literacy which is indispensable in today's technology-driven world.	In response to the feedback from employers, we will be incorporating computer proficiency into the curriculum for Logistics students. This enhancement is aimed at equipping our students with essential technical skills, ensuring they are well-prepared to meet industry standards and excel in their professional careers.
